plainly felt at the latter place than any others which have reported thus far. It was accompanied by a long, low, rumbling noice, that resembled thunder. Scientists are unable to account for the disturbance, but assert that it was a genuine earth-quake, and the first ever felt in this state. In the city the shake was barely discern ible, and few people knew of such a thing until the weather bureau reported tonight. From Santee agency comes a report of quite a severe shake, lasting sixteen sec-

onds. The shock caused some excitement for a while, and was plainly felt by people in the streets. Many windows were shat-tered and dishes rattled from shelves. The movement was from west to east, and was accompanied by a low, rumbling noise. The disturbance appears to have been more clearly felt along the boundary line between Nebraska and South Dakota, alby a bolt. The greatest monetary loss will fall on the contractors for the rapid transit though a number of places in both states were affected.
